

# WOW FUSION FACIAL

Wow fusion is the latest treatment to take the aesthetics industry by storm. This innovative device allows your practitioner to make a personalised skin care cocktail in a glass vial and this is gently stamped into your skin via 20 very small and fine titanium gold plated needles. This allows the solution to penetrate below the protective layer and really work on a cellular level to improve skin health. The wow fusion can improve fine lines and wrinkles, dehydrated skin, hyper-pigmentation, rosacea, acne, scarring, excessive facial sweating and oil production.

Your skin will be assessed prior to treatment and a skin care cocktail will be designed specifically for you, depending on your skin concerns. you can even add botulinum toxin (commonly known as botox) to the mix...
